Global Regulations on Technical Barriers to Trade Issues

24th April 2023 to 31st May 2023

Email: saloni@vekommunicate.com

Website: www.vekommunicate.com

CONTEXT

Article XX of the General Agreement on Tariffs and Trade (GATT) allows governments to enact trade measures to protect human, animal, or plant life or health, provided that the provisions do not discriminate and are not used as disguised protectionism. In addition, two specific World Trade Organization (WTO) agreements deal with food safety, animal and plant health and safety, and product standards in general.

The Sanitary and Phytosanitary Measures (SPS) and technical Barriers to Trade (TBT) Agreements aim to ensure that these requirements do not create unnecessary obstacles to international trade. Under the WTO, members are required to notify other Members before adopting new measures if these are likely to affect international trade and provide an opportunity for comments.

The TBT Agreement seeks to ensure that technical regulations, standards, and testing and certification procedures do not create unnecessary obstacles. The agreement does recognize countries' rights to adopt the standards they consider appropriate—for example, to protect human, animal, or plant life or health; to safeguard the environment; or to meet other consumer interests. In any case, whatever regulations countries use should not discriminate. Under the agreement, the procedures used to decide whether a product conforms with relevant standards have to be fair and equitable, and any methods that would give domestically produced goods an unfair advantage are discouraged.

VeKommunicate track and monitor the SPS and TBT notifications issued at the WTO regularly. This is the second edition of the newsletter on TBT issues “**TBT Matters**”, a series that we are bringing out every month. This will focus on TBT notifications issued during the last month where we will share the details of the notification, product(s) covered, HS Codes referred in the notification and India's exports of the product(s) to the notifying country. This will help you appreciate the notifications and their likely impact on exports of the product to the notifying country.

We welcome you once again to this edition of our TBT Matters. If you have any query or would like to know more about any particular notification, you can write to us. Please feel free to reach out to us with your suggestion and views at saloni@vekommunicate.com.

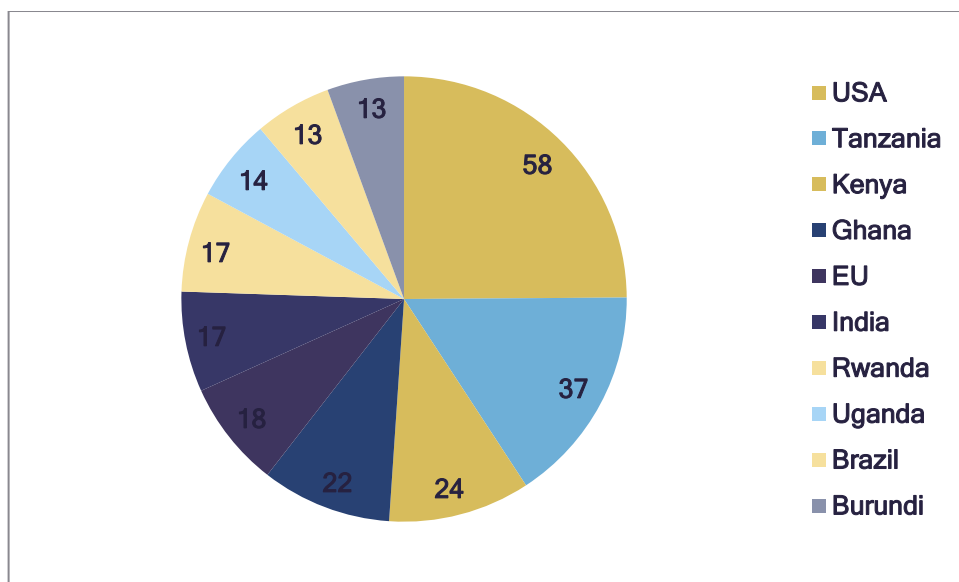

SUMMARY OF TBT NOTIFICATIONS

Issued Between 24th April 2023 to 31st May 2023

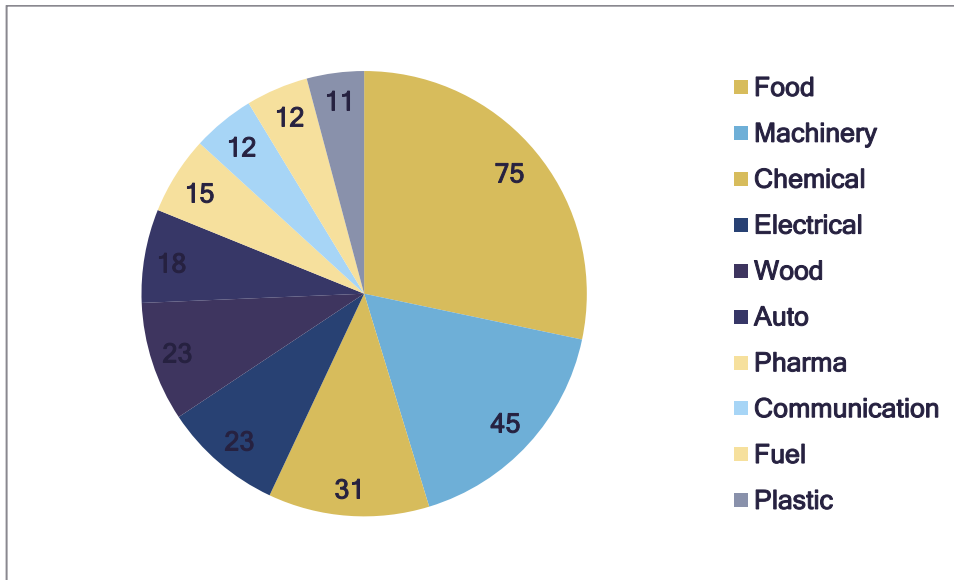

NOTIFICATIONS: IN NUMBERS

The total numbers of TBT Notifications issued by the various WTO-Member Countries from 24th April 2023 to 31st May 2023 were 339. Out of 339 notifications, 84 notifications were the addendums of draft regulations notified earlier in the WTO.

Country-wise (Top 10): Out of the total 339 notifications, USA issued 58 notifications, followed by Tanzania (37), Kenya (24), Ghana (22), EU (18), India (17), Rwanda (17), Uganda (14), Brazil (13) and Burundi (13) notifications, respectively. The remaining 106 notification were from other WTO Member country.

Product-wise (Top 10): Out of the total 339 Notifications, 75 related to food, 45 related to machinery, 31 related to chemical, 23 related to electrical, 23 related to wood, 18 related to auto, 15 related to pharmaceutical, 12 related to communication, 12 related to fuel, 11 related to plastic and 74 notifications were related to other products.

TBT Notifications Issued During 24th April 2023 to 31st May 2023

Sl. No	Notifying Member	Distribution date	Document symbol	Description	HS code(s)	India's Exports of the product to issuing country (Year 2021) Value in US \$ Million)	Notifying Member country's World Import in 2021 (Value in US\$ Million)
1	United States of America	24-04-2023	G/TBT/N/USA/1486/Add.4	• In accordance with the Paperwork Reduction Act of 1995, FMCSA announces its plan to submit the Information Collection Request (ICR) described below to the Office of Management and Budget (OMB) for review and approval. • This notice invites comments on a proposed information collection titled Human Factors Considerations in Commercial Motor Vehicle Automated Driving Systems and Advanced Driver Assistance System. • It is a driving simulator study with a series of questionnaires that will evaluate how commercial motor vehicle (CMV) drivers engage in CMVs equipped with SAE International Level 2 (L2) advanced driver assistance systems (ADAS) and Level 3 (L3) automated driving systems (ADS). • Approximately 100 CMV drivers will participate in the study. The study will examine the effect of non-driving secondary task engagement, transfer of control, and training on driver behavior in CMVs equipped with ADAS and ADS.	8703, 8704	389.42	179128.68

TBT Notifications Issued During 24th April 2023 to 31st May 2023

Sl. No	Notifying Member	Distribution date	Document symbol	Description	HS code(s)	India's Exports of the product to issuing country (Year 2021) Value in US \$ Million)	Notifying Member country's World Import in 2021 (Value in US\$ Million)
2	Korea, Republic of	24-04-2023	G/TBT/N/KOR/1138	The proposed amendments to the Regulation on medical device approval/report/review, etc. are as follows: 1) Recognition of real-world evidence when reviewing clinical trial data 2) Introducing a custom classification procedure for newly developed medical devices such as digital health devices. 3) Preparation of grounds for multiple purposes description of combination medical devices according to its characteristics 4) Easing double inspection when distributing used special medical equipment 5) Expansion of expedited review including medical devices subject to production/import suspension reporting 6) Increase test report accreditation body for bio safety data	9018	7.34	2510.75

TBT Notifications Issued During 24th April 2023 to 31st May 2023

Sl. No	Notifying Member	Distribution date	Document symbol	Description	HS code(s)	India's Exports of the product to issuing country (Year 2021) Value in US \$ Million)	Notifying Member country's World Import in 2021 (Value in US\$ Million)
3	European Union	24-04-2023	G/TBT/N/EU/968	• The reaction to fire performance of wood paneling and cladding, and wood ribbon elements, within the classification provided for in Regulation (EU) 2016/364, is well established only when the material is untreated. • For this reason, the reaction to fire performance of these products can be deemed, without the need for any further testing, to achieve a certain class of performance, as defined in the European classification system mentioned above but this classification cannot be extended to untreated products. • This Delegated Regulation is necessary to prevent misuse of the existing Commission Decision 2006/213/EC.	442191	14.49	178.37
4	United States of America	24-04-2023	G/TBT/N/USA/980/Rev.1/Add.1/Corr.1	The U.S. Department of Energy ("DOE") is correcting a final rule that appeared in the Federal Register on 24 March 2023. That document amended test procedures for commercial and industrial pumps. This document corrects a numbering and amendatory error in that final rule.	8413	275.67	11618.99

TBT Notifications Issued During 24th April 2023 to 31st May 2023

Sl. No	Notifying Member	Distribution date	Document symbol	Description	HS code(s)	India's Exports of the product to issuing country (Year 2021) Value in US \$ Million)	Notifying Member country's World Import in 2021 (Value in US\$ Million)
5	United States of America	24-04-2023	G/TBT/N/USA/1771/Add.1/Corr.1	On 6 February 2023, the Federal Communications Commission revised Commission rules. That document inadvertently failed to update the requirements for changes in name, address, ownership, or control of grantee in the case of a transaction affecting the grantee. This document corrects the final regulations.	8525	13.35	11971.31
6	Korea, Republic of	24-04-2023	G/TBT/N/KOR/1139	The proposed amendments to the Regulation on Stability Test Standard for Medical Devices are as follows: 1) Measurement period for stability test -For the measurement period, at least one time point, including the last time point, can be set for long-term preservation tests and accelerated aging tests of medical devices using raw materials without physical or chemical changes, such as metals, when the data at the start of the test is replaced. 2) Clarification of test items -Test items are divided into biological safety tests, performance tests, and other tests in accordance with the <Regulations on Medical Device Permission, Notification, Review, etc.> and <Regulation on In Vitro Diagnostic Medical Device Permission, Notification, Review, etc.>	9018	7.34	2510.75

TBT Notifications Issued During 24th April 2023 to 31st May 2023

Sl. No	Notifying Member	Distribution date	Document symbol	Description	HS code(s)	India's Exports of the product to issuing country (Year 2021) Value in US \$ Million)	Notifying Member country's World Import in 2021 (Value in US\$ Million)
7	United States of America	24-04-2023	G/TBT/N/USA/1985	• This ANPRM responds to Section 23011(c) of the November 2021 Infrastructure Investment and Jobs Act (IIJA), commonly referred to as the Bipartisan Infrastructure Law (BIL), which directs the Secretary to conduct research on side underride guards to better understand their overall effectiveness, and assess the feasibility, benefits, costs, and other impacts of installing side underride guards on trailers and semitrailers. • The BIL further directs the Secretary to report the findings of the research in a Federal Register notice to seek public comment. In addition, this ANPRM also responds to a petition for rulemaking from Ms. Marianne Karth and the Truck Safety Coalition (TSC).	-		

TBT Notifications Issued During 24th April 2023 to 31st May 2023

Sl. No	Notifying Member	Distribution date	Document symbol	Description	HS code(s)	India's Exports of the product to issuing country (Year 2021) Value in US \$ Million)	Notifying Member country's World Import in 2021 (Value in US\$ Million)
8	Australia	25-04-2023	G/TBT/N/AUS/155	Proposal P1028 proposes to amend the Australia New Zealand Food Standards Code (the Code) to ensure that infant formula products are safe and suitable while also taking account of the latest scientific evidence, market developments, changes in the international regulatory context, and revised Australian and New Zealand policy guidance. The proposed draft variation to the Code will amend infant formula regulation. Relevant aspects include: • Re-drafting of Standard 2.9.1 and related provisions in Schedule 29 to reflect the differing requirements for subcategories of infant formula products (infant formula, follow-on formula and special medical purpose products for infants (SMPPi) • Revised nutrient composition value • Revised permissions for food additives, contaminants and processing aids • Addition of a definition for SMPPi, and associated revisions on nutrient composition, restriction of sale and standalone labelling permissions reflective of Standard 2.9.5 -Foods for Special Medical Purpose (FSMP) • Amendments to clarify the requirements for novel foods when added to infant formula products.	190110	0.09	124.01

TBT Notifications Issued During 24th April 2023 to 31st May 2023

Sl. No	Notifying Member	Distribution date	Document symbol	Description	HS code(s)	India's Exports of the product to issuing country (Year 2021) Value in US \$ Million)	Notifying Member country's World Import in 2021 (Value in US\$ Million)
				A five year transition period, inclusive of stock-in-trade, is proposed.			
9	European Union	26-04-2023	G/TBT/N/EU/972	The draft Regulation introduces obligatory marking of eggs at the production site.	040721	0	1164.85

TBT Notifications Issued During 24th April 2023 to 31st May 2023

Sl. No	Notifying Member	Distribution date	Document symbol	Description	HS code(s)	India's Exports of the product to issuing country (Year 2021) Value in US \$ Million)	Notifying Member country's World Import in 2021 (Value in US\$ Million)
10	European Union	26-04-2023	G/TBT/N/EU/973	The proposal aims at revising common rules for egg marketing standards.	040721	0	1164.85
11	European Union	26-04-2023	G/TBT/N/EU/974	The delegated regulation aims at revising common rules for poultrymeat marketing standards.	0207	0	8531.79
12	Denmark	26-04-2023	G/TBT/N/DNK/131	• The draft will replace the current statutory order no. 1142 of 10 July 2022 on farm enterprises' usage of fertilizers. With the new draft, a number of rules are changed. The changes are mainly minor clarifications and adjustments. • The notification under the WTO TBT agreement relates to section 8, subsection 1 and 2. Section 8 contains requirements for the application of artificial fertilizers containing urea-based nitrogen in order to prevent ammonia emissions. • Addition of urease inhibitor to artificial fertilizers is one possible method to fulfill the requirements. With the proposed amendment to the statutory order, the urease inhibitor is required to be CE marked.	31	0.01	367.62

TBT Notifications Issued During 24th April 2023 to 31st May 2023

Sl. No	Notifying Member	Distribution date	Document symbol	Description	HS code(s)	India's Exports of the product to issuing country (Year 2021) Value in US \$ Million)	Notifying Member country's World Import in 2021 (Value in US\$ Million)
13	Kenya	26-04-2023	G/TBT/N/KEN/1424	The purpose of these Regulations shall be to: (a) Extend the responsibility of a producer over a product and its packaging during the entire life cycle of the product or its packaging (b) provide an overarching framework for establishment and operation of mandatory extended producer responsibility schemes (c) Optimize the life cycle approach to management of products and associated wastes (d) enhance resource mobilization for management of products and sustainable waste management (e) operationalization of polluter pays principle 2. These Regulations shall apply to (a) a producer; (b) an individual extended producer responsibility compliance schemes; and (c) a producer responsibility organisation	382510	0	0

TBT Notifications Issued During 24th April 2023 to 31st May 2023

Sl. No	Notifying Member	Distribution date	Document symbol	Description	HS code(s)	India's Exports of the product to issuing country (Year 2021) Value in US \$ Million)	Notifying Member country's World Import in 2021 (Value in US\$ Million)
14	European Union	26-04-2023	G/TBT/N/EU/969	• The draft delegated act supplements Regulation (EU) No 1308/2013 by merging and amending rules on marketing standards currently contained in Commission Implementing Regulation (EU) No 543/2011, Commission Implementing Regulation (EU) No 1333/2011 and Commission Regulation (EC) No 1666/1999, by aligning these rules to market development and to the Farm to Fork Strategy. • It repeals Commission Implementing Regulation (EU) No 543/2011, Commission Implementing Regulation (EU) No 1333/2011 and Commission Regulation (EC) No 1666/1999. • This draft delegated act aligns market development with the objectives of the Farm to Fork Strategy, regarding in particular increased information for consumers and reduction of food waste. • It modernizes and simplifies the rules by merging fruit and vegetables legislation with banana and dried grapes legislation, and deleting obsolete provisions. Some amendments align with recent changes in quality standards adopted by the United Nations Economic Commission for Europe (UNECE).	07, 08	422.78	83894.16

35	New Zealand	01-05-2023	G/TBT/N/NZL/99/Add. 1	The Organic Products and Production Act 2023 was Assented on 5 April 2023, giving effect to the Organic Products Bill (notified as G/TBT/N/NZL/99). The Act is not expected to become fully operational until three years from when the national organic standard comes into effect. The Organic Products and Production Act 2023 provide a framework for regulating organic products. The Act: 1. Requires all organic businesses who make organic claims to be approved by meeting all the requirements in the relevant standards set forth in regulations. 2. Allows for the development of regulations and national organic standards detailing production and processing requirements for certain products. The Act will not be effective until after the national organic standard is developed. 3. Allows for the establishment of conformity and assessment procedures and requirements to be set for third parties who will check organic businesses and take part in ongoing compliance	-	2.01	126.32

101	Australia	05-05-2023	G/TBT/N/AUS/112/Ad d.3	- Following the gazettal of requirements for pregnancy warning labels on alcoholic beverages on 31 July 2020, industry identified a technical issue with the printing of the pregnancy warning mark on corrugated cardboard packaging when using a post-print (flexographic) printing process and made an application to amend Standard 2.7.1 of the Australia New Zealand Food Standards Code. Standard 2.7.1 requires a pregnancy warning mark to be in three colours (red, black and white). - Most corrugated cardboard packaging used for alcoholic beverages is printed using a post-print process which can result in misalignment of the warning mark due to the three-colour requirement, making the label difficult to read thereby reducing effectiveness and risking non-compliance. - Food Standards Australia New Zealand (FSANZ) has approved an amendment to Standard 2.7.1 to permit an alternative pregnancy warning mark only for corrugated cardboard outer packages for retail sale that are printed using a post-print process and contain more than one individual unit of an alcoholic beverage. - The alternative pregnancy warning mark	2204 to 2208	1.52	59.52

TBT Notifications Issued During 24th April 2023 to 31st May 2023

Sl. No	Notifying Member	Distribution date	Document symbol	Description	HS code(s)	India's Exports of the product to issuing country (Year 2021) Value in US \$ Million)	Notifying Member country's World Import in 2021 (Value in US\$ Million)
				has specific one-colour (black), contrast and size requirements as set out in Standard 2.7.1 which will ensure effectiveness of the labelling is maintained. The alternative pregnancy warning mark has been permitted to enable industry to resolve technical misalignment issues for a specific type of packaging in a cost-effective manner and to consistently comply with the Code. • The requirement for pregnancy warning labels on all other packaging and individual alcoholic beverage containers has not changed. The end of the transition period for all other packaging and individual containers to display pregnancy warning labels remain sat 31 July 2023.			

TBT Notifications Issued During 24th April 2023 to 31st May 2023

137	New Zealand	09-05-2023	G/TBT/N/NZL/90/Add. 3	- Following the gazettal of requirements for pregnancy warning labels on alcoholic beverages on 31 July 2020, industry identified a technical issue with the printing of the pregnancy warning mark on corrugated cardboard packaging when using a post-print (flexographic) printing process and made an application to amend Standard 2.7.1 of the Australia New Zealand Food Standards Code. - Standard 2.7.1 requires a pregnancy warning mark to be in three colours (red, black and white). - Most corrugated cardboard packaging used for alcoholic beverages is printed using a post-print process which can result in misalignment of the warning mark due to the three-colour requirement, making the label difficult to read thereby reducing effectiveness and risking non-compliance.	22	0	0

154	United States of America	10-05-2023	G/TBT/N/USA/770/Add.3	• In January 2014, the U.S. Consumer Product Safety Commission (CPSC or Commission) published a consumer product safety standard for bedside sleepers pursuant to section 104 of the Consumer Product Safety Improvement Act of 2008 (CPSIA). • The Commission's mandatory standard incorporated by reference the ASTM voluntary standard that was in effect for bedside sleepers at the time, with modifications to further reduce the risk of injury associated with bedside sleepers. • The CPSIA sets forth a process for updating mandatory standards for durable infant or toddler products that are based on a voluntary standard, when a voluntary standards organization revises the standard. On 6 February 2023, ASTM notified CPSC that it had published a revised voluntary standard for bedside sleepers. • This direct final rule updates the mandatory standard for bedside sleepers to incorporate by reference ASTM's 2023 version of the voluntary standard for bedside sleepers.	940360	0.00	294.35

220	United States of America	23-05-2023	G/TBT/N/USA/1597/Add.2	• In this document, the Federal Communications Commission (Commission) continues taking steps to sustain and spur growth within the white space ecosystem and adopts three orders addressing pending issues associated with white space devices. • These actions will provide additional certainty to white space device users and manufacturers to enable unlicensed white space devices to operate efficiently while protecting other spectrum users. • In the Report and Order the Commission adopts rules specifying the database re-check interval for the new categories of mobile and narrowband white space devices established in 2020. In the Order on Reconsideration, the Commission dismisses in part and, on alternative and independent grounds, denies a petition for reconsideration of two rule changes for white space devices operating in the broadcast television (TV) bands. • In the Memorandum Opinion and Order, the Commission declines to modify the rules to permit white space databases to use more complex terrain-based models to determine the available frequencies for white space devices and will instead continue to rely on the simpler	852560	0.34	678.62

222	India	23-05-2023	G/TBT/N/IND/265	• Cast iron products under consideration are manhole covers, Cast iron pipe, Malleable iron fittings, and Grey iron castings. Cast iron, an alloy of iron that contains 2 to 4 percent carbon, along with varying amounts of silicon (up to 3 percent) and manganese and traces of impurities such as sulfur and phosphorus. • Cast iron is highly preferred for its casting ability into complex shapes when molten and its low cost. • It is the favoured choice over steel because of its compressive strength, excellent vibration dampening, corrosion resistance, wear-resistance and ease of machining capability. Different types of cast irons are produced using different process and heat treatment techniques.	732599, 732510	-	-

240	India	25-05-2023	G/TBT/N/IND/266	Solar DC Cable and Fire Survival Cable (Quality Control) Order, 2023 - A Solar DC Cables (Electric Cable for Photovoltaic Systems) are primarily used for the interconnection of the various elements of photovoltaic system such as solar panel arrays. These cables are designed for connecting photovoltaic power supply systems. These cables can be used indoor & outdoor for flexible and fixed installations with high mechanical strength in extreme weather conditions. - Fire Survival Cable is designed to sustain the high temperatures for a defined minimum period of time under direct fire. The construction of these cables is different if compared with ordinary cables. The conductor is manufactured with a specially designed heat barrier and fire resistant insulation which resists the fire to reach conductor surface. The cable continues to remain into operation at high temperatures like 650°C, 750°C and 950°C as per various conditions of operation and applications. It is used in Nuclear power plants, Airports, Metro Rails, Refineries, High rise building, Shopping mall, and Cinema theatres etc.	854419	-	-

				enough current to weld the seam closed. The resulting weld is very small. In Drawn over mandrel (DOM) process, a mandrel is a small piece of metal inserted into the tube to define a shape. It gives the tube extra support to prevent unwanted wrinkling during drawing. The tube is passed through a die that has a smaller diameter than the current tube size. As the tube is drawn, it shrinks to match the size of the die's diameter. This process allows for tight tolerances and specifications.

284	United States of America	30-05-2023	G/TBT/N/USA/2005	• The United States Environmental Protection Agency (EPA) is proposing amendments to the new chemicals procedural regulations under the Toxic Substances Control Act (TSCA). • These amendments are intended to align the regulatory text with the amendments to TSCA's new chemicals review provisions contained in the Frank R. Lautenberg Chemical Safety for the 21st Century Act, enacted on 22 June 2016, improve the efficiency of EPA's review processes, and update the regulations based on existing policies and experience implementing the New Chemicals Program. • The proposal includes amendments that would reduce the need to redo all or part of the risk assessment by improving information initially submitted in new chemicals notices, which should also help reduce the length of time that new chemicals notices are under review. • EPA is also proposing several amendments to the regulations for low volume exemptions (LVEs) and low release and exposure exemptions (LoREXs), which include requiring EPA approval of an exemption notice prior to commencement of manufacture, making per-and polyfluoroalkyl substances (PFAS) categorically ineligible for	28, 29	2.14	214.17

328	European Union	31-05-2023	G/TBT/N/EU/984	This proposal for a directive concerns voluntary environmental claims in business-to-consumer commercial communications. It sets out requirements for the substantiation and communication of voluntary environmental claims and labels on goods, services and organisations. It also sets out requirements for environmental labelling schemes. As such, the notified draft sets down technical regulations covering: terminology, symbols, packaging, marking and labelling requirements as they apply to a product, process or production method. The notified draft also introduces a procedure of ex-ante verification of the claim's fulfilment of the technical requirements, i.e. a conformity assessment.	-	0.00	0.03

335	Ukraine	31-05-2023	G/TBT/N/UKR/258	- At the beginning of the imposition of martial law, the Government of Ukraine has established that a conclusion about the quality of imported medicinal products, including registered medicinal products in foreign packaging manufactured for the needs of foreign markets, that do not comply with the approved registration documents, may be issued, inter alia, without the mandatory availability of a document confirming that the conditions of manufacture of medicinal products comply with the requirements for the manufacture of medicinal products in Ukraine, except for active pharmaceutical ingredients (substances). - At the same time, the confirmation of compliance of the manufacturing conditions of medicinal products with the GMP requirements in force in Ukraine was introduced to prove that medicinal products are constantly manufactured and controlled in accordance with quality standards that are appropriate for their intended use. - According to Compilation of Community Procedures on Inspections and Exchange of Information (EC EMA/572454/2014) only a GMP inspector can assess the compliance of production with GMP requirements.	30	0	0.09

TBT Notifications Issued During 24th April 2023 to 31st May 2023

Sl. No	Notifying Member	Distribution date	Document symbol	Description	HS code(s)	India's Exports of the product to issuing country (Year 2021) Value in US \$ Million)	Notifying Member country's World Import in 2021 (Value in US\$ Million)
				In order to provide Ukrainian consumers with quality and safe medicinal products, the draft Resolution of the Cabinet of Ministers of Ukraine cancels the possibility of issuing a conclusion about the quality of imported medicinal products without a document confirming that the conditions of production of medicinal products meet the requirements for the production of medicinal products in Ukraine, except for active pharmaceutical ingredients (substances).
