Global Regulations on Technical Barriers to Trade Issues

01st June 2023 to 30th June 2023

Email: saloni@vekommunicate.com /
aman@vekommunicate.com
Website: <https://vekommunicate.com/>

CONTEXT

Article XX of the General Agreement on Tariffs and Trade (GATT) allows governments to enact trade measures to protect human, animal, or plant life or health, provided that the provisions do not discriminate and are not used as disguised protectionism. In addition, two specific World Trade Organization (WTO) agreements deal with food safety, animal and plant health and safety, and product standards in general.

The Sanitary and Phytosanitary Measures (SPS) and technical Barriers to Trade (TBT) Agreements aim to ensure that these requirements do not create unnecessary obstacles to international trade. Under the WTO, members are required to notify other Members before adopting new measures if these are likely to affect international trade and provide an opportunity for comments.

The TBT Agreement seeks to ensure that technical regulations, standards, and testing and certification procedures do not create unnecessary obstacles. The agreement does recognize countries' rights to adopt the standards they consider appropriate—for example, to protect human, animal, or plant life or health; to safeguard the environment; or to meet other consumer interests. In any case, whatever regulations countries use should not discriminate. Under the agreement, the procedures used to decide whether a product conforms with relevant standards have to be fair and equitable, and any methods that would give domestically produced goods an unfair advantage are discouraged.

VeKommunicate track and monitor the SPS and TBT notifications issued at the WTO regularly. This is the second edition of the newsletter on TBT issues “**TBT Matters**”, a series that we are bringing out every month. This will focus on TBT notifications issued during the last month where we will share the details of the notification, product(s) covered, HS Codes referred in the notification and India's exports of the product(s) to the notifying country. This will help you appreciate the notifications and their likely impact on exports of the product to the notifying country.

We welcome you once again to this edition of our TBT Matters. If you have any query or would like to know more about any particular notification, you can write to us. Please feel free to reach out to us with your suggestion and views at saloni@vekommunicate.com/
aman@vekommunicate.com.

SUMMARY OF TBT NOTIFICATIONS

Issued Between 01st June 2023 to 30th June 2023

NOTIFICATIONS: IN NUMBERS

The total numbers of TBT Notifications issued by the various WTO-Member Countries from 01st June 2023 to 30th June 2023 were 310. Out of 310 notifications, 71 notifications were the addendums of draft regulations notified earlier in the WTO.

Country-wise (Top 10): Out of the total 310 notifications, USA issued 43 notifications, followed by Rwanda (19), Uganda (19), Burundi (18), India (18), Kenya (18), Tanzania (18), Egypt (13), Viet Nam (11) and Israel (10) notifications, respectively. The remaining 123 notification were from other WTO Member country.

Product-wise (Top 10): Out of the total 310 Notifications, 85 related to food, 34 related to machinery, 27 related to chemical, 25 related to Iron & Steel, 18 related to Cosmetic, 17 related to Electric, 13 related to Communication, 9 related to explosives, 8 related to pharmaceutical, 8 related to auto and 66 notifications were related to other products.

TBT Notifications Issued During 01st June 2023 to 30th June 2023							
Sl. No.	Notifying Member	Distribution date	Document symbol	Description	HS code(s)	India's Exports of the product to issuing country (Year 2022) Value in US \$ Million)	Notifying Member country's World Import in 2022 (Value in US\$ Million)
1	United States of America	01-06-2023	G/TBT/N/USA/1854/Add.1	• The Energy Policy and Conservation Act, as amended ("EPCA"), prescribes energy conservation standards for various consumer products and certain commercial and industrial equipment, including consumer pool heaters. • EPCA also requires the U.S. Department of Energy ("DOE" or "the Department") to periodically determine whether more-stringent, standards would be technologically feasible and economically justified, and would result in significant energy savings. • In this final rule, DOE is adopting new and amended energy conservation standards for consumer pool heaters. It has determined that the new and amended energy conservation standards for these products would result in significant conservation of energy, and are technologically feasible and economically justified.	841919	0.03	555.52
2	Bahrain, Kingdom of	01-06-2023	G/TBT/N/BHR/643/Add.1	The aim of this addendum is to inform WTO members that the content of the WTO TBT Notification (G/TBT/N/BHR/643) related to updating the existing Technical Regulation on energy labelling and minimum energy performance requirements for small capacity Air-Conditioners in the Bahraini market, has been restricted to using SEER values on	841581	0	0.59

TBT Notifications Issued During 01st June 2023 to 30th June 2023

Sl. No.	Notifying Member	Distribution date	Document symbol	Description	HS code(s)	India's Exports of the product to issuing country (Year 2022) Value in US \$ Million)	Notifying Member country's World Import in 2022 (Value in US\$ Million)
				the labels only with a transitional period (grace period) of 18 months after being published in the national gazette, as per the request of the WTO members, local manufacturers and distributors, and notified bodies.			
3	India	01-06-2023	G/TBT/N/IND/270	• This standard covers the requirements and tests for aluminium stranded conductors used for overhead transmission purposes. It consists of terminologies (Stranded conductor, diameter of conductor, direction of lay, lay ratio), physical constraints for Hard drawn Aluminium (Resistivity, density, constant-mass temperature coefficient of resistance, coefficient of linear expansion), Material specification, Dimension and construction specification, Packing and marking, various tests requirements, etc. • This standard covers the requirements and tests for aluminum conductors, galvanized steel-reinforced used for overhead power transmission purposes. • This standard covers the requirements and test for Aluminium alloy stranded conductors of the aluminium-magnesium-silicon type for overhead power	760429, 761410, 761490	-	-

TBT Notifications Issued During 01st June 2023 to 30th June 2023

Sl. No.	Notifying Member	Distribution date	Document symbol	Description	HS code(s)	India's Exports of the product to issuing country (Year 2022) Value in US \$ Million)	Notifying Member country's World Import in 2022 (Value in US\$ Million)
				transmission purposes. • This standard covers the requirement and tests for aluminium conductors, galvanized steel-reinforced used for extra high voltage overhead power lines (400 kV and above).			
4	United States of America	01-06-2023	G/TBT/N/USA/2006	Pipeline and Hazardous Materials Safety Administration proposes to amend the Hazardous Materials Regulations to maintain alignment with international regulations and standards by adopting various amendments, including changes to proper shipping names, hazard classes, packing groups, special provisions, packaging authorizations, air transport quantity limitations, and vessel stowage requirements.	382499	20.86	6300.45
5	United States of America	01-06-2023	G/TBT/N/USA/521/Rev.1/Add.1	• The U.S. Department of Energy (DOE) is publishing a final rule to amend the compliance date for its manufactured housing energy conservation standards. • Currently, manufacturers must comply with these standards on and after 31 May 2023. This final rule delays compliance until 1 July 2025, for Tier 2 homes, and until 60 days after issuance of enforcement procedures for Tier 1 homes. • DOE is delaying the compliance date to allow DOE more time to establish	871610	0.00	94.32

TBT Notifications Issued During 01st June 2023 to 30th June 2023

Sl. No.	Notifying Member	Distribution date	Document symbol	Description	HS code(s)	India's Exports of the product to issuing country (Year 2022) Value in US \$ Million)	Notifying Member country's World Import in 2022 (Value in US\$ Million)
				enforcement procedures that provide clarity for manufacturers and other stakeholders regarding DOE's expectations of manufacturers and DOE's plans for enforcing the standards.			
6	United States of America	01-06-2023	G/TBT/N/USA/1895/Add.1	• This final rule updates the Federal Aviation Administration (FAA) manual requirements to reflect industry use of electronic and paper manuals. • The amendments apply to fractional ownership operations; domestic, flag, and supplemental operations; rules governing the operations of U.S.-registered civil airplanes which have a seating configuration of 20 or more passengers or a maximum payload capacity of 6,000 pounds or more when common carriage is not involved; and commuter and on-demand operations. • This action requires manuals accessed in paper format to display the date of last revision on each page, and it requires manuals accessed in electronic format to display the date of last revision in a manner in which a person can immediately ascertain it. • The FAA instead requires program managers or certificate holders to ensure the appropriate parts of the manual are	88	392.52	27148.27

TBT Notifications Issued During 01st June 2023 to 30th June 2023

Sl. No.	Notifying Member	Distribution date	Document symbol	Description	HS code(s)	India's Exports of the product to issuing country (Year 2022) Value in US \$ Million)	Notifying Member country's World Import in 2022 (Value in US\$ Million)
				accessible to flight, ground, and maintenance personnel when such personnel are performing their assigned duties. Lastly, this rule updates outdated language that refers to accessing information in manuals kept in microfiche. The FAA removes this outdated language and simply requires that all manual information and instructions be displayed clearly and be retrievable in the English language.			
7	United States of America	01-06-2023	G/TBT/N/USA/1855/Add.1/Corr.2	The Environmental Protection Agency (EPA) is correcting a final rule that was published in the Federal Register on 29 March 2023, that will be effective on 30 May 2023. The final rule corrected and updated regulations for source testing of emissions. This correction does not change any final action taken by the EPA on 29 March 2023; this action merely corrects the amendatory instruction.	-	-	-

52	United States of America	06-06-2023	G/TBT/N/USA/1958/Add.1	TITLE: Safer Products Restrictions and Reporting AGENCY: Department of Ecology, State of Washington ACTION: Adopted rule SUMMARY: On 31 May 2023, the Washington State Department of Ecology adopted a new rule, Chapter 173-337 WAC—Safer Products Restrictions and Reporting. This new chapter establishes a regulatory program to reduce toxic chemicals in consumer products and increase product ingredient transparency, as directed by Washington State law. The adopted rule implements the regulatory actions reported to the Washington State Legislature in June 2022; Regulatory Determinations Report to the Legislature: Safer Products for Washington Cycle 1 Implementation Phase 3. It creates reporting requirements and restrictions that apply to priority consumer products that contain priority chemicals, which include:--PFAS in aftermarket stain- and water-resistance treatments, carpets and rugs, and leather and textile furnishings.--Ortho-phthalates in vinyl flooring and in personal care product fragrances.--Organohalogen flame retardants in electric and electronic products.--Flame retardants (as defined in RCW 70A.350.010) in recreational polyurethane foam.--Phenolic	28, 29	13.35	11971.31

67	India	08-06-2023	G/TBT/N/IND/277	Aluminium and Aluminium Alloy Products (Quality Control) Order, 2023: - Aluminium is an important strategic metal for India's economy. After the iron and steel industry, aluminium is the second most important industry. It can be cast, melted, formed, machined, and extruded, allowing it to be formed into a variety of shapes and then fabricated to suit a wide range of applications. Aluminium is used in the production and distribution of electricity being a good conductor of electricity, household utensils and electric appliances, aircraft manufacturing, rail coaches, nuclear and defence accessories, and so on. - The downstream sector of Aluminium involves the transformation of aluminium into semi-finished products such as rods, bars, castings, forgings, and so on. Wrought aluminum is alloy of aluminum that has been subjected to mechanical working by processes such as rolling, extrusion or forging. Aluminium alloy tube is a type of round, hollow pipe made of Aluminium alloy, and is available in a variety of diameters and thicknesses. Aluminium tube has a huge range of uses from irrigation, automobile and other construction applications etc.	760120	0.38	8.14

71	India	08-06-2023	G/TBT/N/IND/274	Plywood and Wooden flush door shutters (Quality Control) Order, 2023 • A Plywood and wooden flush door have a wooden frame over which plywood, MDF or natural wood is fixed on both the sides. The hollow parts are filled with cardboard material. The Wooden flush door is usually imparted a laminate, veneer or paint finishing in various designs and colours. • A Plywood is usually made from hardwood, which makes the board very heavy. So, plywood doors are much heavier than Wooden flush doors (they have softwood blocks inside). Heavy doors can be very difficult to carry, install, and operate in everyday use.	4412	0.10	131.18

76	Canada	09-06-2023	G/TBT/N/CAN/674/Add.1	The proposed regulatory amendments notified in G/TBT/N/CAN/674 (dated 15 June 2022) were adopted and published June 7, 2023 as the Carriages and Strollers Regulations (new Regulations). The requirements of the now-repealed Carriages and Strollers Regulations (repealed Regulations) had not changed substantively since they were introduced in 1985, while carriage and stroller design has evolved considerably. Current designs of carriages and strollers may present hazards that were not addressed by the repealed Regulations. In addition, some terminology in the repealed Regulations required clarification and updating to keep pace with current designs. Health Canada also identified lack of alignment with the requirements in other jurisdictions, and the limited time provided to transition from one standard or regulation to a new version, to be issues warranting amendment. The new Regulations cover five types of requirements related to carriages and strollers: 1. Mechanical 2. Surface coating materials	8715	0.95	20.43

190	United States of America	22-06-2023	G/TBT/N/USA/1826/R ev.1	• In this document, the Federal Communications Commission (Commission or we) seeks comment on revisions to its rules governing spectrum sharing among a new generation of broadband satellite constellations to promote market entry, regulatory certainty, and spectrum efficiency. • Specifically, the Commission seeks comment on which metrics should be used to define the protection afforded to a non-geostationary satellite orbit, fixed-satellite service (NGSO FSS) system authorized through an earlier processing round from an NGSO FSS system authorized through a later processing round, including the implementation of a degraded throughput methodology.	880260	-	-

223	United States of America	23-06-2023	G/TBT/N/USA/1737/Add.4	TITLE: Proposition 12, Farm Animal Confinement AGENCY: Department of Food and Agriculture, State of California ACTION: Implementation Announcement SUMMARY: The Sacramento Superior Court has issued a modification of its 28 November 2022 Order in California Hispanic Chambers of Commerce v. Ross (Case No. 34-2021-80003765) concerning enforcement of Proposition 12 with respect to whole pork meat. The Court's new order provides that the previously issued injunction against enforcement expires as scheduled on 1 July 2023, except with respect to certain noncompliant whole pork meat that is already in the stream of commerce (as detailed in the Court's order), which may be sold through 31 December 2023. Specifically, the Court's new order states: 1. The declaratory and injunctive relief imposed by the Court in its 2 February 2022 Judgment and Prohibitory Writ of Mandate, as modified by the Court's 28 November 2022 Order, will expire on 1 July 2023, except with respect to noncompliant whole pork meat that: 2 a. as of 1 July 2023, is in the possession of an "end-user" (Cal. Code Regs., tit. 3, § 1322, subd. (o)) or a "pork distributor" (id., subd. (t)) or on the premises of an establishment at which	01	1.77	824.90

272	Israel	26-06-2023	G/TBT/N/ISR/1281	Revision of the Mandatory Standard SI 682 part 1, dealing with the safety requirements of children's cots and folding cots for domestic use. This draft standard revision adopts the European Standard EN 716-1: 2017 and AC: March 2019, with a few national deviations that appear in the standard's Hebrew section. The major differences between the old version and this new revised draft standard are as follows: • Introduction of the elements of the amendment • Modifies the references • Adds a warning concerning the risk of adding a second mattress to the bed The requirements of all sections of the proposed revised standard will be mandatory except for the new national Section 3.8 dealing with the baby's cot. Both the old standard and this new revised standard will apply from entry into force of this revision for a period of 12 months. During this time, products may be tested according to the old or the new revised standard.	9403	0.25	66.32

296	India	28-06-2023	G/TBT/N/IND/284	Steel Wires/ Strands, Nylon Wire and Wire Mesh (Quality Control) Order, 2023: • Wire ropes are composite construction of strands of fibre or steel or both, bunched to form a core surrounded by stranded and twisted cores. A wire rope is designated by the overall diameter, the number of strands, number of wires per strand, the cores, the type of lay and the length etc. Wire rope is a versatile material that can be inter alia used to lift, hoist, separate, position, secure, remove, repair, readjust, support and brace items in a safe and effective manner. Individual designs of wire rope involve different materials, wire, and strand configurations. • The three basic components of wire rope are the wire, strand, and core, which are wound together to form the rope. The basic element of wire rope is wire that is used to configure, shape, and form the rope. Typically, steel, stainless steel, aluminum, copper, and nylon (non-metal) are used for manufacturing wires. The choice of wire is dependent on the type of work the wire is going to be used to perform with strength,	7312	0.10	131.18
